- Technologies/Frameworks: *React JS, HTML5, CSS3*
- Scripts/UI: *JavaScript, JQuery, Fetch, BootStrap*
- Database: *Mongo DB*
- Application/Web Server: *Node JS, Express*
- Versioning and other tools: *Git, Github*
- Deployment Tools: *Netlify, Heroku*

KEY PROJECTS

Github Battle   **React JS / Github API / Netlify**

Web app consumes a third-party Github API and displays information on users and popular repositories
- Split code along multiple routes using ECMAScript's dynamic import
- Cached data that was collected from the Github API to improve reload time

Hacker News   **React JS / Hacker News API / Netlify**

Web app consumes a third-party Hacker News API and displays top posts, comments, and users
- Refactored components to adhere to new Class Fields Declaration in ES6

Weather App   **Node JS / Heroku**

Web app created with Node JS
- Created a form that collects a location from the user and fetches weather information from a third-party API
- Served up a JSON HTTP endpoint with Express and rendered it to the browser

Muskie Shop   **Node JS / Heroku**

E-Commerce Store for Muskie fishing
- Responsive design and styling with a focus on mobile first views
